Total No of students attended: 76

This programme covered the following objectives and learning outcomes.

Objectives:

- Drug delivery systems eg: oral, parenteral and transdermal delivery systems.
- All modes of drug entry.
- Microcapsules, liposomes, vesicles, macromolecular conjugates.
- Antibody targets
- Protein or peptide delivery
- DNA, oligonucleotide and siRNA delivery.

Topics covered:

- Introduction
- Types of new drug carrier systems
- General mechanisms considerations.
- Surface functionalization.
- Tissue targeting design
- Combined therapy by simultaneously encapsulated drugs.
- Pharmaceutical applications
- Brain delivery
- Mucosal delivery
- Skin delivery
- Pulmonary delivery

Learning outcomes:

New drug carrier systems provide the hope to treat and diagnose several diseases.

Several advanced clinical studies are marketed now a days that show favorable results.

The rational development of these carrier systems will provide new ways of treatment than current conventional drugs.

In future new entities will be available that will offer new perspectives for the treatment of diseases.

Add on programme on **ADVANCES IN DRUG DELIVERY SYSTEM** is very much useful to the students.

Total 76 students were participated actively in the programme.

The management and Dr. Y. A. Chowdary, Principal of Nri college of pharmacy thanked the resource person Mr. U. SAMBAMOORTHY, Associate Professor, and participants for making the programme successful.

NRI college of pharmacy

Date of the programme : 18 / 01 / 2021 to 29 / 01 / 2021.

Number of students attended: 56

This programme covered the following objectives and learning outcomes.

Objectives:

- Define the terms of medical devices
- Categorize medical devices
- List of relevant legislations of the medical devices.
- Sterilization and disinfection process of medical devices
- Describe the similarities and key differences in content and approach.
- Goals of national post market medical device surveillance system.
- Combined products list.
- Quality system of medical devices.
- Assessment procedures for medical devices.

Topics covered:

- History of medical devices
- Definitions.
- Regulations and oversight
- Designs and prototype
- Product development
- Software
- Medical equipment
- Licensing
- Developing regulatory issues in India.

Learning outcomes:

The student will be able to understand:

- Developments in biomedical equipment technology
- Biomedical equipment management
- Understand the different requirements.
- Use of medical devices safely.

Total 56 students were participated actively in the training. This programme is very much useful to the students and the feedback was positive. The management and Dr. Y. A. Chowdary, Principal of NRI college of pharmacy thanked the resource person Dr.I.V.RAMARAO, Associate Professor and participants for making the programme successful.

Number of students attended: 91

Department of Pharmacology of NRI college of pharmacy organized Add-on course on “**Health care quality**” from 01/03/ 2021 TO 22 / 03 /2021.

This programme covered the following objectives and learning outcomes.

Objectives:

- Promote the discipline of quality, risk and safety in health care system.
- Engage in research that will enhance quality.
- Practice health care safety.
- Know the different health care accreditation organizations
- Planning and preparation of a quality and safety management system.

- Establishing a quality and safety management system.
- Establishing a monitoring system.

Topics covered:

- What is quality?
- Taking action for quality.
- National strategic direction on quality.
- High quality primary health care.
- Monitoring and evaluation.
- Quality resilient health systems.
- WHO'S response

Learning outcomes:

After studying this course, student should be able to:

- Define what is meant by quality improvement in health care.
- Describe the different dimensions of quality health care.
- Patient outcome (health).
- System performance (care).
- Professional development (system).

Total 91 students were participated actively in the programme. This programme is very much useful to the students and the gained knowledge regarding health care quality.

The management and Dr. Y. A. Chowdary, Principal of Nri college of pharmacy thanked the resource person Mrs. G.USHAKIRAN, Associate Professor, and participants for making the programme successful.

Department of Pharmaceutical chemistry,
NRI College of pharmacy

Date of the programme : 30 / 03 / 2021 to 17 / 04 / 2021.

Number of students attended: 56

This programme covered the following objectives and learning outcomes.

Objectives:

- Drug discovery is a complex process involving multiple and often conflicting objectives as well as multiple potential causes of candidate attrition.
- Quantitative structure–activity relationships (QSAR) has adapted to the multi task concept moving from the perception of single-objective to the multi-objective drug discovery.
- Drug-likeness defines boundaries on the chemical space and functions as filter to guarantee a physicochemical profile enabling further development.
- Predictions of potency and the different biological/pharmacokinetic/toxicity end points rely on the construction of local or global QSAR models, web platforms and workflows.

- Step-by-step single-objective optimization considers each property or each model separately.
- Multi-objective optimization is based on overall property scores, desirability functions, and the Pareto concept, permitting to conceive an 'overall QSAR' as a function of the separate models.
- Further challenges for QSAR are how to address the multiple pathways of complex diseases, the targeted therapies for individual population groups, and the treatment of big data.

Topics covered:

- Processing of molecular data.
- Step by step optimization of each model.
- Evaluation of data set model ability.
- Novel approaches to QSAR modeling.
- Role of QSAR in risk management.
- Regulatory decisions in drug discovery and lead optimization.
- QSAR in toxicity prediction.

Learning outcomes:

- The increasing use of information technology in the discovery of new molecular entities encourages the use of modern molecular-modeling tools to help teach important concepts of drug design to chemistry and pharmacy undergraduate students.
- Statistical models such as quantitative structure–activity relationships (QSAR) often as its 3D QSAR variant are commonly used in the development and optimization of a leading compound.

Total 56 students were participated actively in the training. This programme is very much useful to the students and the feedback was positive. The management and Dr. Y. A. Chowdary, Principal of NRI college of pharmacy thanked the resource person SK. BASHEER, Associate Professor and participants for making the programme successful.

PROGRAMME REPORT

Name of the programme : CERTIFICATE COURSE on "PHARMACOVIGILANCE"

Resource Person details : Mrs. P.DIVYA,
Associate professor,
7660803772,
Divya.palapartii@gmail.com
Department of Pharmaceutics,
NRI college of pharmacy

Number of students attended: 62

Date of the programme : 15 / 04 / 2021 to 28 / 04 / 2021.

This programme covered the following objectives and learning outcomes.

Objectives:

- Pharmacovigilance and global pharmacovigilance system.
- Case processing and reporting.
- Medical dictionary and medical aspects in pharmacovigilance.
- Safety monitoring in clinical trials.
- Standard operating procedures.
- Compliance monitoring.
- Pharmacovigilance communications.
- Pharmacoepidemiology.
- Medication errors.

Topics covered:

- Patient safety.
- Education & training.
- Public health.
- Rational use of drugs.
- Benefits – risk assessment of drugs.
- Health care workers.
- Hospital academics.
- Media.
- Physician and medical regulations.

Learning outcomes:

The ultimate goal of pharmacovigilance is

- The rational and safe use of medical drugs.
- The assessment and communication of the risks and benefits of drugs in market.
- Educating and informing of patients and consumers.

Total 62 students were participated actively in the training. This programme is very much useful to the students and the feedback was positive.

The management and Dr. Y. A. Chowdary, Principal of NRI college of pharmacy thanked the resource person Mrs. P.Divya, Associate Professor and participants for making the programme successful.

PROGRAMME REPORT

Name of the programme : Add-on course on "ELECTRO CHEMISTRY"

Duration of course : 02 / 08 / 2021 TO 19 / 08 / 2021

Resource Person details : Dr. G. VAMSI KRISHNA,
Professor,
9866439968,
Vamsi.lok16@gmail.com,
Department of Pharmaceutical Analysis,
NRI college of pharmacy

Number of students attended: 91

This programme covered the following objectives and learning outcomes.

Objectives:

- To distinguish between galvanic and electrolytic cells.
- Predict spontaneous reactions using redox potentials.
- To balance redox reactions using half reactions.
- To understand the relationship between cell potential and the equilibrium constant.
- To be able to measure solution concentrations using cell potentials.
- To describe the process of corrosion.
- To understand electrolysis and to be able to describe it qualitatively.

Topic covered:

- Electrochemical cell.
- Voltaic cell.
- Redox reactions.

- Half reactions.
- Salt bridge.
- EMF
- Faraday constant.
- Nernst equation.
- Corrosions.
- Electrolysis
- Electroplating.

Learning outcomes:

After studying this course, student should be able to:

- Describe each of the electrochemical methods discussed.
- Perform quantitative calculations for each of the methods.
- Compare the advantages and disadvantages of the different electrochemical methods of analysis.
- Select the best method from among those covered for a particular analysis

Total 91 students were participated actively in the programme. This programme is very much useful to the students and the gained knowledge. The management and Dr. Y. A. Chowdary, Principal of Nricollege of pharmacy thanked the resource person Dr. G. VAMSI KRISHNA, Professor, and participants for making the programme successful.
