Report on FDP

Name of the Programme: A Five days FDP on "Recent Advancements on Herbal Formulations and Drug Delivery Systems of Indian System of Medicine".

Organized by: NRI College of Pharmacy

Date: 01.07.2019 to 05.07.2019

Resource Person: Dr. D. Lakshman Kumar
Assoc Prof, CHIPS-Guntur
Mobile no: 9581204003
Emailid: d_lakshmankumar@chips.ac.in

Objective of FDP

The objective of this FDP is to provide information about recent advancement in herbal formations and drug delivery system product of Indian system of medicine to familiarize the participants on cutting edge research delivery of research areas and techniques in herbal formulation and drug delivery system of Indian system of medicine.

Outcome of FDP

Introduction to herbal formulation, formulation and development of conventional herbal formulation dissolution testing of herbal formulation new drug delivery system for herbal drug pharmacokinetics of herb metal-based formation validation of herbal formulation practical demonstration on herbal formulations and drug delivery system.

Conclusion: By incorporation the herbal drug and drug delivery system of Indian system of medicine we can deliver the proper amount of dosage to the target site thus it conclude that NDDS for herbal drugs will be a revolutionary application in the conventional herbal formulation which will save the time of preparation and will increase the patient compliance too.

ABOUT THE INSTITUTION

Sri Durga Malleswara Educational Society was established in 2007 with the objective of reaching the Zenith in the field of education. NRI College of Pharmacy, started in 2007 and NRI Institute Technology, started in 2008 are the result of such sincere and dedicated efforts and stern determination of the founders of the society. The founders are socially conscious and continuously responding to the needs and requirements of the region, to uplift the region and to promote educational facilities by establishing schools, to promote games and sports activities in the region, help the poor and improve their health standards by organizing free medical camps etc., NRI College of Pharmacy have been taking a place of pride every year JNTUK results are announced. NRI College of Pharmacy had added a feather to the crown of the Society by successfully placing its outgoing batch of dynamic young pharmacists in various esteemed Organizations.

VISION

To provide profound, diligent, magnanimity education in pharmacy.

MISSION

Involving faculty members and students in Research and Development to become globally competitive and for betterment of healthcare society. Providing Quality Education, Social Values, Professional Ethics, Developing Entrepreneurship values for the pharma Aspirants.

Emailid: kalyani.lakshmitripura@gmail.com

Objective of FDP

The objective of this FDP is to, develops better insight into topic, provides systematic structure, enhance the research quality, derive better solutions and give a conceptual clarity of the research issues.

Outcome of FDP

The participants will be able to explore outcome-based methods of teaching and learning the knowledge acquired from experts will be percolated to the students and ultimately benefit them. The participants will be able to identify upcoming research areas across various specialization and fields of research.

Conclusion: A wide array of control measures has been suggested with various labels including oversight mechanism self-governance self-policing self-censorship best practices codes of conduct and of ethics measures for international techniques.

Resource Person: Dr. M.D. Dhanraju
Principal, GITE-Rajahmundry
Mobile no: 9440770913
Emailid: dhanraj_md.ac.in

Objective of FDP

The objective of this FDP is to know the importance of computational methods in drug discovery and screening of large compound library, determination of potential binders through modeling/ simulation and visualization techniques.

Outcome of FDP

Explain and place into context of commonly used computational methods for structure and ligand- based drug design. Explain useful applications of various computational methods to given problems within drug designing.

Conclusion: Computational tools are now used routinely to investigate the structure, dynamics, surface properties and thermodynamics of inorganic, biological and polymeric systems.
